

Julia Aderemi

Backend Developer

✉ juliaaderemi@gmail.com [in](#) LinkedIn [G](#) Github [P](#) Portfolio

SUMMARY

Backend developer with experience working with Node.js, Express, MongoDB, and related frameworks and tools to build server side logic, web applications, and APIs. I focus on clean code, and making systems easy to monitor and maintain.

PROFESSIONAL EXPERIENCE

Aug 2025	Backend Developer <i>Agripeller</i> - Built the KYC (know your customer) verification feature for users - Added secure authentication features (refresh and access tokens) - Implemented the Escrow account feature
Feb 2025 – present	Backend Developer <i>Nomira</i> - Successfully set up the Node.js backend and implemented user Login and Delete functionality. - Deployed backend server to cloud infrastructure - Integrated a Django API into Node.js API
Feb 2024 – Jul 2024 Lagos, Nigeria	Cloud Engineer (High Performance Computing) Intern <i>Chevron Nigeria Limited</i> - Assisted in deploying 72 new HPC Supermicro workstations to enhance user experience and optimize infrastructure performance. - Provided troubleshooting support for RHEL Linux desktops. - Monitored and addressed alert messages using PRTG. - Provided technical support for workstations and managed system moves and decommissioning. - Ensured compliance of HPC workstation blades.

EDUCATION

Oct 2022 – Jul 2025 Ilishan-remo, Nigeria	Computer Science (Information Systems) <i>Babcock University</i> CGPA 4.76/5.0
--	---

SKILLS

JavaScript (DOM manipulation)

Node.JS with Express (handling requests, error handling, API consumption, authentication and authorization etc.)

MongoDB & Mongoose (Creating DBs, collections, models etc...)

C++ (Object Oriented Programming)

PROJECTS

E-commerce API [🔗](#)

A scalable RESTful API built for a fictional crochet store, handling product listings, user authentication, and cart operations. Designed with modular architecture and secure access control using JWT.

Incident Reporting Management System [🔗](#)

This project showcases my knowledge in Node JS with Express, MongoDB, routing, EJS, JavaScript, and logical thinking.
